

Colloquium Notice

John Conway

**Gorenstein Professor of Mathematics, Queens College (Emeritus,
Princeton University)**

The free will theorem

The limited degree of free will required to make a binary decision independent of previous history is also inherent in elementary particles. The proof relies on three uncontested axioms taken from quantum mechanics and relativity theory.

Wednesday

May 7, 2014

Starts at 12:15 PM

Coffee at 12:00 PM

Physics Conference Room, SB B326
